WAJEH AMASH

Junior QA Engineer | Manual Testing

Jisr az-Zarqa, Israel | 052-343-6525 | amashwajeh5@gmail.com
Portfolio: awajeh.site | GitHub: github.com/AWajeh

PROFESSIONAL SUMMARY

Junior QA with hands-on experience from two full testing projects – a mobile app and an e-commerce website: test design and execution, bug reporting, functional and regression testing with Jira and TestRail. Next step: test automation (Selenium, Playwright, Cypress) in the Automation College course.

QA PROJECTS

Wolt — Mobile Application QA *Software Test Report | October 2026*

- Designed and executed 480 test cases on Android and iOS (real iPhone 17 Pro Max).
- Functional, negative, edge-case, localization and accessibility testing.
- Documented 55 defects in Jira with reproduction steps and screenshots; managed the run in TestRail.
- Compared Android and iOS behavior and reported platform-specific differences.

Machsanei Hashmal — E-Commerce Website QA *Software Test Report | October 2026*

- Designed and executed 208 test cases across 21 functional sections.
- Covered browsing, cart, coupons, checkout and payment methods.
- Documented defects in Jira and managed regression execution in TestRail.
